borg& overström

High-capacity dispensing

The T1 eliminates the need for single-use plastic bottles with high-capacity dispensing. It delivers 50 litres per hour of chilled, ambient, and sparkling drinking water, making refilling reusable vessels such as drinking bottles fast and convenient.

Cutting-edge UV protection

As an option, the T1 can be pre-fitted with Viovand[®], a mercury-free, chemical-free and energy-efficient LED-UV water purification system. For complete peace of mind, it also includes additional hygiene features via Borg & Overström's Totality[®] methodology.

Next-generation ProCore™

Under the counter is a compact powerhouse. ProCore™ is a low-maintenance next-generation water dispensing system. In addition to being energy-efficient, it's fitted with the new eco R290 refrigerant gas.

Plug and play installation

There are no fiddly wires to connect with the T1. The plug and play USB 3 connector makes this tap super easy to install.

Countertop convenience

This integrated tap system can be positioned over a sink or combined with a stylish circular drip tray which complements the design of the tap. The drip tray can either be plumbed into mains waste or used with the Borg & Overström alarmed waste kit.

Minimal yet durable design

Beneath the minimalist, contemporary exterior lies an innovative water dispensing system built for durability and efficiency. The tap is PVD coated for a high-end yet durable finish, while the undercounter cabinet is colour-coated GreenCoat[®] steel.

Low energy consumption

The T1 is consistently energy efficient, making it both economical and eco-friendly. This dynamic integrated tap system is lean and economical, with absolutely no sacrifice to output and quality.

Ventilation kit included

A ventilation kit is included with this system. It's easy to install and increases the efficiency of the ProCore™ by allowing a continuous cycle of cool air.

Totality® - Hygiene-assured refreshment

Totality® is our assurance that water dispensed from a Borg & Overström water dispenser is as safe as it is refreshing. Water dispensers with a six-star Totality® rating deliver an exceptionally high standard of hygiene.

Digital precision
The discreet digital touch panel has an antimicrobial coating for a reassuringly clean experience. Chilled, sparkling, or ambient water can also be dispensed touch-free via the Bluetooth® app.

Advanced UV-led protection.
As an option, the T1 can be fitted with Viovandt®, a mercury-free, chemical-free and energy-efficient LED-UV water purification system. For complete peace of mind, it also includes additional hygiene features via Borg & Overström's Totality® methodology.

Sealed drinking water system.
Dry Chill® is the most hygienic cooling process. No water is stored within the system, which greatly reduces the opportunity for bacteria to become established. Dry Chill® also produces a larger volume of lower temperature water due to its faster recovery time.

Independently certified anti-microbial, antipathogen sanitising procedure.
All dispensers are sterilised using Sterizen® sanitising infusion. No other brand of watercooler goes through this process, which is why only Borg & Overström appliances are laboratory certified to be 99.999% bacteria reduced.

High-performing, easy to fit carbon filters.
3M carbon filters provide the highest level of water hygiene security for your dispenser over a longer period of time. All Borg & Overström water dispensers can be fitted with 3M carbon filters.

Additions for T1

Biodegradable paper cups
Environmentally-friendly disposable cups designed to fit Borg & Overström cup dispensers perfectly.

Personal drinking bottles
500ml capacity in black. Comes with quick-release leak-proof cap and carry strap.

500/750ml glass bottles
Suitable for dishwashers and bottlewashers. Both sizes are a perfect fit for the T1 tap. Stylish swing-top lid.

Deep Sparkle® CO² refills
Can be disposed via standard steel recycling or general waste. Requires CO² regulator with gauge.

Sanitisation kit
Six monthly sanitising cycles ensure appliances function at the optimum hygiene levels.

Alarmed waste kit
Featuring an audible high-water level alarm to prevent the waste tank from overflowing.

Install kit with 3M filter
Install appliances simply and effectively in a wide range of applications. Complete with a 3M filter.

T1 Drip tray
The T1 drip tray is available in a steel and black finish. It can either be plumbed into mains waste or used with the alarmed waste kit.

Water refill station
The refill station comes complete with a lockable spacious storage area. This heavy duty cabinet is constructed from black coated steel with a stainless steel top.
