NEW

Viva

by Zummo

A new concept in citrus squeezing has arrived. Viva brings new value to your establishment, an innovative concept that combines design with the most cutting-edge technology. Maximum performance for your business. Maximum style.

Forest Green

EQS™

Exchange Quick System

With that intuitive system, the EVS squeezing kit is grouped into a single block minimising the number of parts. Easily assemble and disassemble the squeezing kit in one easy movement. Save time and turn it into profit.

Two modes of use

AUTO

Automatic mode

Squeezing is activated when oranges are detected in the fruit dispenser.

Manual mode

Control the squeezing by yourself using the Play/Pause button.

Rediscover Silence

At Zummo we have developed a new traction system based on independent motors. This system reduces the mechanical friction between parts and minimises the noise level.

Fruit dispenser

Up to 1.5 kg of fruit in the minimum space. Its sloping design makes it easy to load the fruit and makes it highly visible, creating an eye-catcher in your business.

NEW

Zummo Cloud

Geolocation

Manage your machine fleet in a simple and efficient way.

Productivity metrics

Increase the profitability of your business thanks to the main consumption and performance indicators.

Status indicators

Always know how your juicer is doing to give the best service to your customers and interact with Viva from anywhere to change its status.

Preventive and predictive maintenance

Increase the life of your juicer and the quality of your juice thanks to constant monitoring of the most important parameters.

Automatic filter

An innovative rotating design which guarantees the highest quality and purity of the juice.
